The Little Star that Could

Kindergarten

PHYSICAL SCIENCE (PS)

Objects and materials can be sorted and described by their properties.

- Objects can be sorted and described by the properties of the materials from which they are made. Some of the properties can include color, size and texture.

1st Grade

EARTH AND SPACE SCIENCE (ESS)

The sun is the principal source of energy.

- Sunlight warms Earth's land, air and water. The amount of exposure to sunlight affects the amount of warming or cooling of air, water and land.

PHYSICAL SCIENCE (PS)

Objects can be moved in a variety of ways, such as straight, zigzag, circular and back and forth.

- The position of an object can be described by locating it relative to another object or to the object's surroundings. An object is in motion when its position is changing. The motion of an object can be affected by pushing or pulling. A push or pull is a force that can make an object move faster, slower or go in a different direction.
